

CABAÇAL COPPER-GOLD PROJECT
DISTRICT-SCALE VOLCANIC MASSIVE SULPHIDE OPPORTUNITY

MERIDIAN MINING S.E.

Corporate Presentation - November 2020

TSX-V: MNO

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain of the statements made and information contained herein is "forward-looking information" within the meaning of applicable Canadian securities laws. All statements other than statements of historical facts included in this document constitute forward-looking information, including but not limited to statements regarding the Company's plans, prospects and business strategies; the Company's guidance on the timing and amount of future production and its expectations regarding the results of operations; expected costs; permitting requirements and timelines; timing and possible outcome of pending litigation; the results of any Preliminary Economic Assessment, Feasibility Study, or Mineral Resource and Mineral Reserve estimations, life of mine estimates, and mine and mine closure plans; anticipated market prices of metals, currency exchange rates, and interest rates; the Company's ability to comply with contractual and permitting or other regulatory requirements; anticipated exploration and development activities at the Company's projects; and the Company's integration of acquisitions and any anticipated benefits thereof. Words such as "believe", "expect", "anticipate", "contemplate", "target", "plan", "goal", "aim", "intend", "continue", "budget", "estimate", "may", "will", "can", "could", "should", "schedule" and similar expressions identify forward-looking statements.

The Company cautions that it has not completed any feasibility studies on any of its mineral properties, and no mineral reserve estimate or mineral resource estimate has been established. Geophysical and geochemical exploration targets are preliminary in nature and not conclusive evidence of the likelihood of a mineral deposit

Forward-looking information is necessarily based upon various estimates and assumptions including, without limitation, the expectations and beliefs of management, including that the Company can access financing, appropriate equipment and sufficient labour; assumed and future price of manganese, copper, zinc, gold and other metals; anticipated costs; ability to achieve goals; the prompt and effective integration of acquisitions; that the political environment in which the Company operates will continue to support the development and operation of mining projects; and assumptions related to the factors set forth below. While these factors and assumptions are considered reasonable by Meridian Mining S.E. as at the date of this document in light of management's experience and perception of current conditions and expected developments, these statements are inherently subject to significant business, economic and competitive uncertainties and contingencies.

Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: risks inherent in and/or associated with operating in foreign countries; uncertain political and economic environments; community activism, shareholder activism and risks related to negative publicity with respect to the Company or the mining industry in general; changes in laws, regulations or policies including but not limited to those related to permitting and approvals, environmental and tailings management, labour, trade relations, and transportation; delays or the inability to obtain necessary governmental approvals and/or permits; regulatory investigations, enforcement, sanctions and/or related or other litigation; risks associated with business arrangements and partners over which the Company does not have full control; risks associated with acquisitions and related integration efforts, including the ability to achieve anticipated benefits, unanticipated difficulties or expenditures relating to integration and diversion of management time on integration; competition; development or mining results not being consistent with the Company's expectations; estimates of future production and operations; operating, cash and all-in sustaining cost estimates; allocation of resources and capital; litigation; uninsurable risks; volatility and fluctuations in metal and commodity prices; the estimation of asset carrying values; funding requirements and availability of financing; indebtedness; foreign currency fluctuations; interest rate volatility; changes in the Company's share price, and equity markets, in general; changing taxation regimes; counterparty and credit risks; health and safety risks; risks related to the environmental impact of the Company's operations and products and management thereof; unavailable or inaccessible infrastructure and risks related to ageing infrastructure; risks inherent in mining including but not limited to risks to the environment, industrial accidents, catastrophic equipment failures, unusual or unexpected geological formations or unstable ground conditions; actual mined varying from estimates of grade, tonnage, dilution and metallurgical and other characteristics; mineralisation processing efficiency; risks relating to attracting and retaining of highly skilled employees; ability to retain key personnel; the potential for and effects of labour disputes or other unanticipated difficulties with or shortages of labour or interruptions in production; the price and availability of energy and key operating supplies or services; the inherent uncertainty of exploration and development, and the potential for unexpected costs and expenses including, without limitation, for mine closure and reclamation at current and historical operations; risks associated with the estimation of Mineral Resources and Mineral Reserves and the geology, grade and continuity of mineral deposits including but not limited to models relating thereto; actual mineralisation mined and/or metal recoveries varying from Mineral Resource and Mineral Reserve estimates; mine plans, and life of mine estimates; the possibility that future exploration, development or mining results will not be consistent with expectations; natural phenomena such as earthquakes, flooding, and unusually severe weather; potential for the allegation of fraud and corruption involving the Company, its customers, suppliers or employees, or the allegation of improper or discriminatory employment practices, or human rights violations; security at the Company's operations; breach or compromise of key information technology systems; materially increased or unanticipated reclamation obligations; risks related to mine closure activities; risks related to closed and historical sites; title risk and the potential of undetected encumbrances; risks associated with the structural stability of waste rock dumps or tailings storage facilities; and other risks and uncertainties.

All of the forward-looking statements made in this document are qualified by these cautionary statements. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated, forecast or intended and readers are cautioned that the foregoing list is not exhaustive of all factors and assumptions which may have been used. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking information. Accordingly, there can be no assurance that forward-looking information will prove to be accurate and forward-looking information is not a guarantee of future performance. Readers are advised not to place undue reliance on forward-looking information. The forward-looking information contained herein speaks only as of the date of this document. The Company disclaims any intention or obligation to update or revise forward-looking information or to explain any material difference between such and subsequent actual events, except as required by applicable law.

This presentation may contain certain financial measures which have no standardized meaning within generally accepted accounting principles under IFRS and therefore amounts presented may not be comparable to similar data presented by other mining companies. This data is intended to provide additional information and should not be considered in isolation or as a substitute for measures or performance prepared in accordance with IFRS.

QUALIFIED PERSON: The technical information about the Company's exploration activity and exploration target range has been reviewed and approved under the supervision of Dr. Adrian McArthur (B.Sc. Hons, PhD. FAusIMM), the CEO and Chief Geologist of Meridian Mining, who is a "qualified person" within the meaning of National Instrument 43-101.

Note: All dollar amounts are in US dollars unless otherwise denoted

MERIDIAN INVESTMENT HIGHLIGHTS

Portfolio of copper-gold exploration assets with targeted work programs

Brazil proven mining jurisdiction hosting several large scale gold and base metal mines

International technical and commercial board, backed by experienced Brazilian management

Option to acquire 100% of a district scale VMS camp with 30km strike length and multiple targets

Two previous high grade underground mines. Open at depth and along strike.

Program to evaluate development potential of large historic copper-gold resource*

***Note:**

*Readers are cautioned that the historic resource is not considered to be current for purposes of NI 43-101. A 0.20% CuEquiv % cut off grade was applied ($\text{CuEquiv \%} = \text{Cu \%} + (0.51 * \text{Au ppm})$); Met. Recovery = 85% Cu, 65% Au; Au price US\$ 845 / oz; Cu price US\$ 4000 / ton).

CABACAL: OVERVIEW AND BRAZIL COPPER-GOLD SECTOR

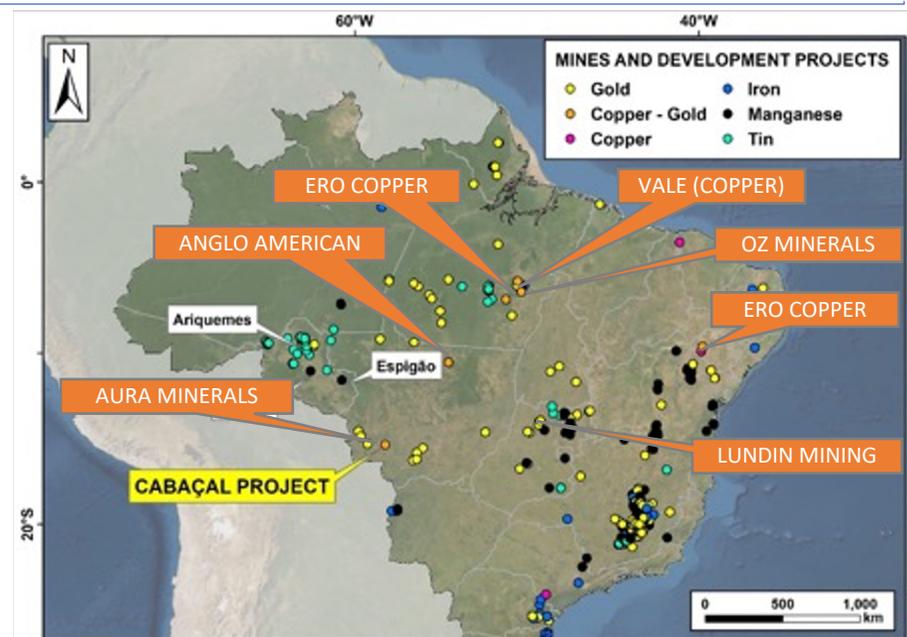

CABAÇAL PROJECT

- Volcanic Massive Sulphide (VMS) camp scale opportunity with copper-gold, plus silver, zinc and lead mineralization
- Tenements cover 30km strike length of deformed & folded prospective stratigraphy
- Meridian applying modern exploration techniques to capitalize on advances in VMS exploration in under-explored belt

BRAZILIAN CU-AU PROJECTS

Brazil hosts several large scale base metal mines, development assets, and exploration frontiers:

- ERO Copper has successfully restructured a historic mining complex to produce approx. 40ktpa Cu, and are currently executing a large scale exploration program
- Anglo American large tenement package of over 40,000 km² in Mato Grosso and Para states following recognition of porphyry copper potential**
- Aura Minerals EPP mine produces approx. Au 60,000 ounces/annum located ~100km to the west of Cabaçal
- Lundin Mining acquired the Chapada copper-gold mine from Yamana Gold in July, 2019 for USD 800 million
- OZ Minerals USD 418 million acquisition of Avanco Resources in August 2018

SELECTED BRAZILIAN CU-AU PROJECTS

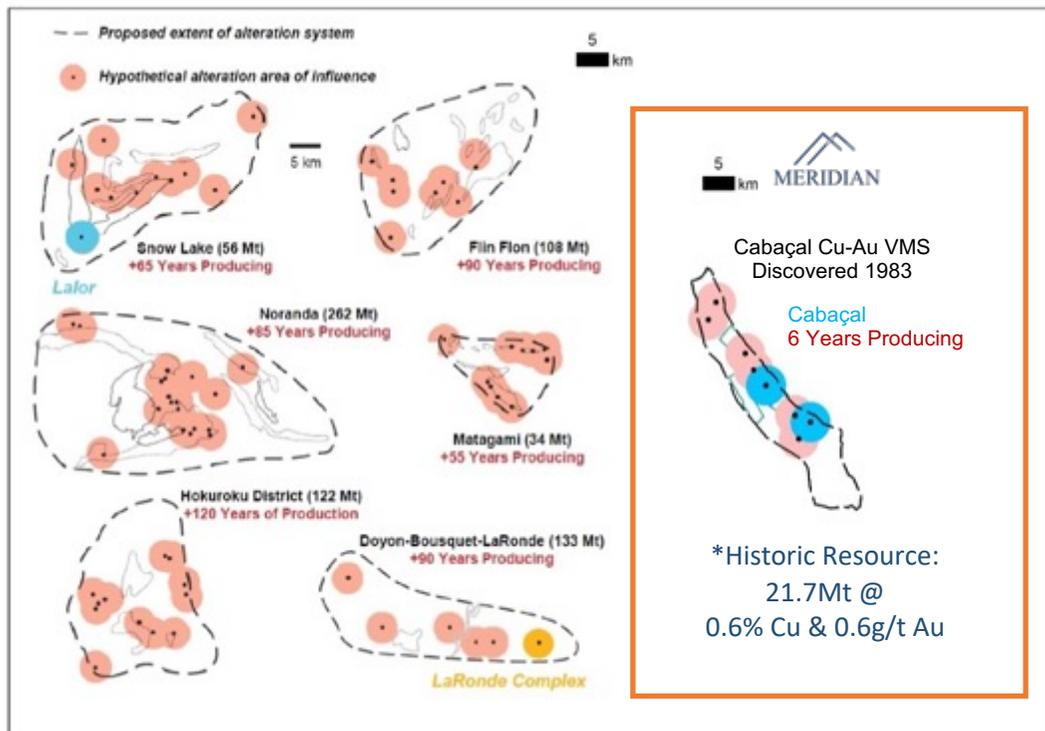

Brazilian Economy*	
GDP (2019)	USD 1.87 trillion
GDP Rank (2019)	9th
Real - USD	▲ 5.53
Government Royalty (Copper)	2.00%
Government Royalty (Gold)	1.50%
Corporate Tax Rate	34.00%

CABAÇAL: DEFINING THE INDUSTRY'S NEXT VMS CAMP

MAJOR VMS MINING DISTRICTS

Source:

Akita University, Galley et al. (2007); Mercier-Langevin et al. (2007) S1P Global, Hudbay 2020
See Meridian Announcement of August 26, 2020.

CABAÇAL VMS PROJECT ANALOGUES

- Consolidating ownership of a VMS belt at a camp scale is a rare opportunity.
- VMS deposits tend to form periodically, related to hydrothermal convection cells on the ocean floor at ~4km spacings
- Multiple targets are consistent with deposit clustering, with potential for blind repeats
- Deposits are well known for their base and precious metal production
- Image opposite shows notable examples on the same scale, including:
 - LaRonde Penna deposit of the Doyon-Bousquet-mining camp (Quebec, Canada)

*“We are excited about the potential for more ore discovery around Cabaçal and in belt as a whole... In a Canadian context the Cabaçal Belt would be a prime long term target for VMS type mineralization, with strong competition for ground holding.”***

Note:

*Readers are cautioned that the historic resource is not considered to be current for purposes of NI 43-101.

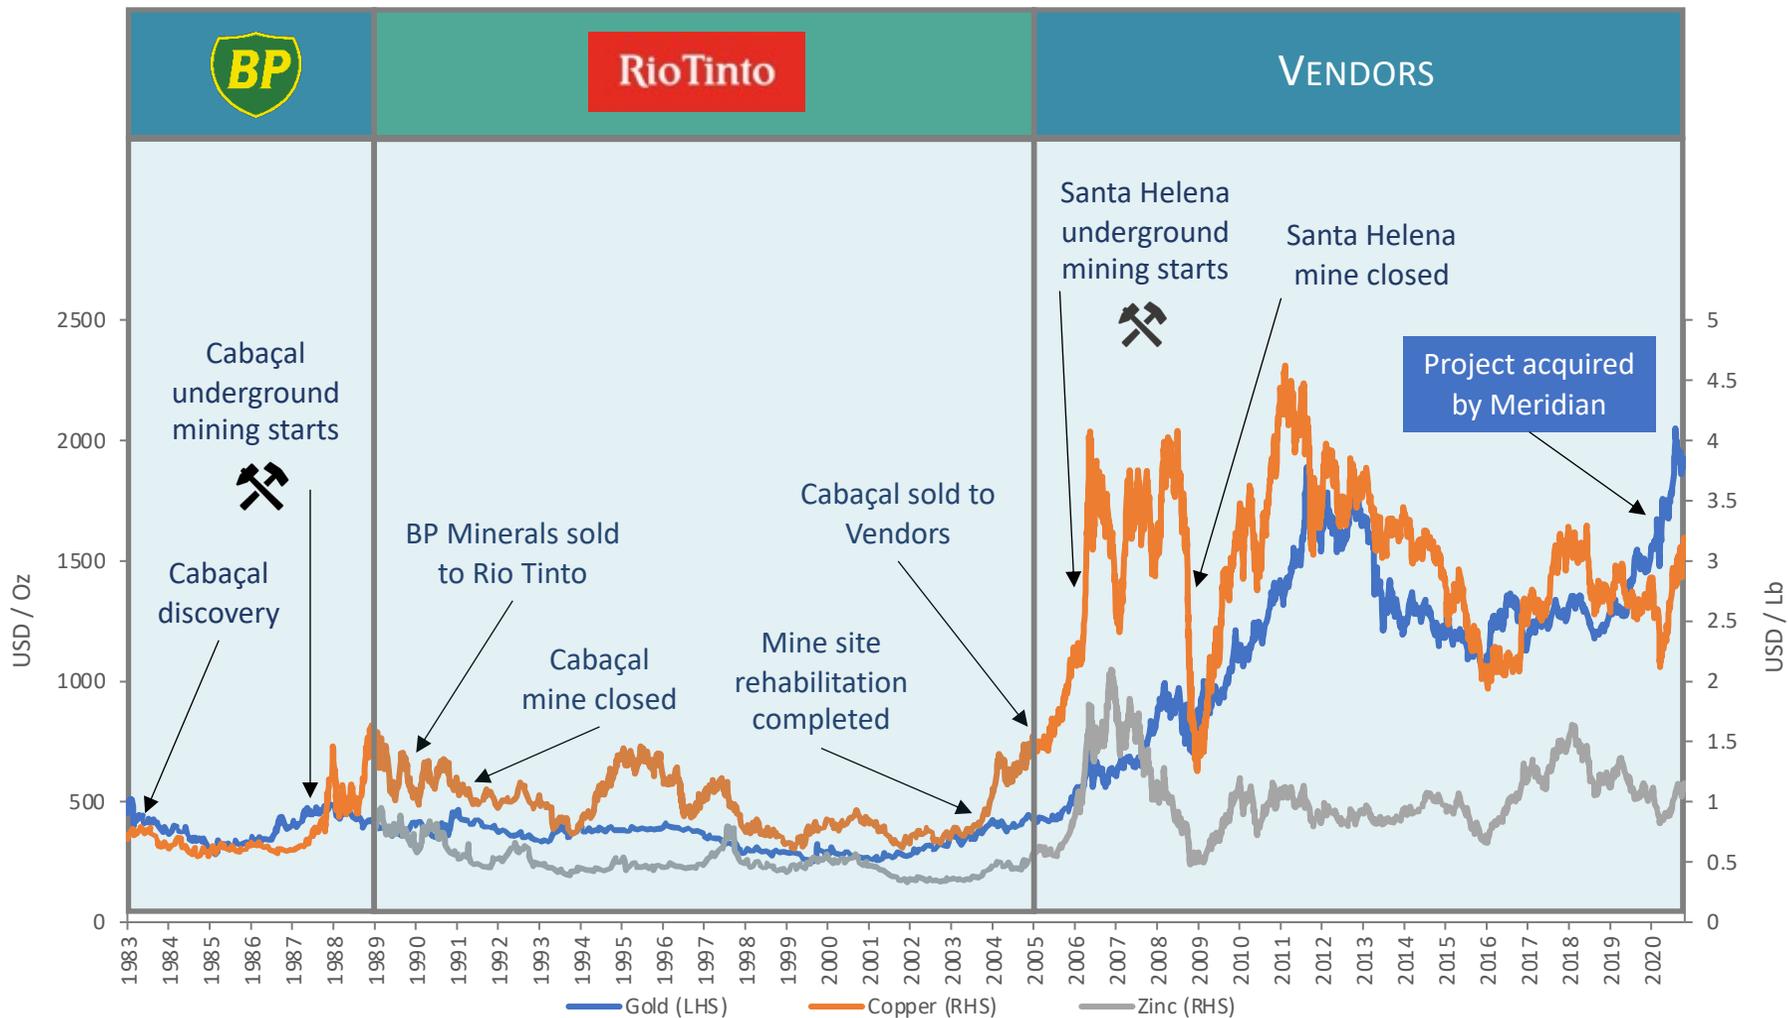

A 0.20% CuEquiv % cut off grade was applied (CuEquiv % = Cu % + (0.51 * Au ppm); Met. Recovery = 85% Cu, 65% Au; Au price US\$ 845 / oz; Cu price US\$ 4000 / ton).

CABAÇAL: PROJECT DEVELOPMENT VS METALS PRICING OVER TIME

TIMING AND HISTORY ARE CRUCIAL IN MINING TRANSACTIONS AND VALUE CREATION*

Notes:

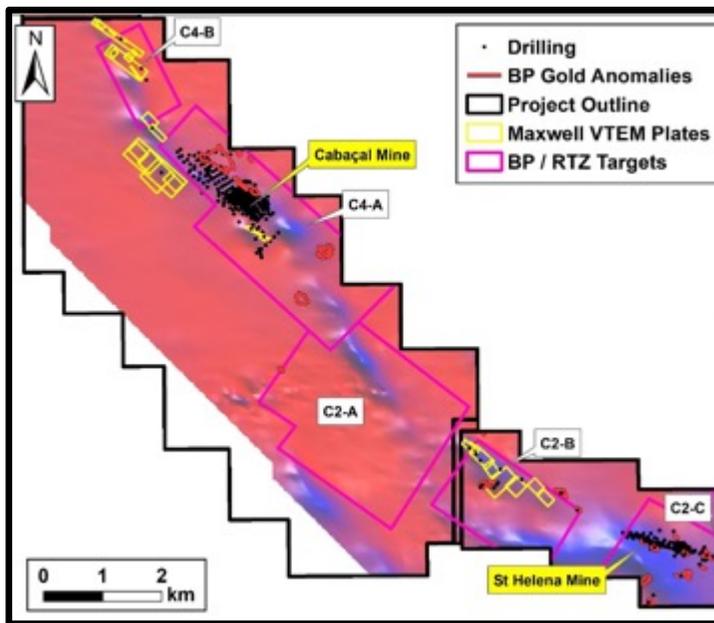

*Prices sources: Factset

CABAÇAL: VMS PROJECT EXTENSIVE HISTORIC DATABASE

HISTORICAL INVESTMENT IN EXPLORATION

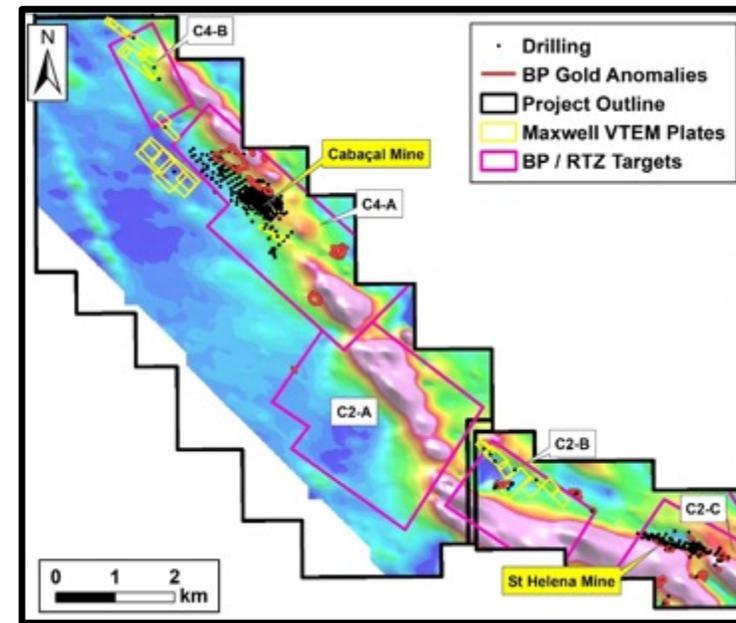

- Historical Resource - 21.7Mt @ 0.6% Cu 0.6g/t Au*
- 600 diamond drill holes totalling 70,000 m
- 17,300 samples (surface geochemical and drill core assay)
- 2,800 km line of historical aerial geophysics
- 190 km of historical ground geophysics
- 2007 - Modern VTEM Survey; 977 line kilometers
- 2015 - validation hole confirmed that replicated the position and tenor of of the historical drilling

MINE CORRIDOR: VTEM CONDUCTIVITY WITH TARGET

VTEM SURVEY

- VTEM survey provided high quality magnetic and conductivity data across the belt
- Twenty bedrock anomalies identified. Maxwell conductivity plates modelled extending for hundreds of meters.
- Three conductivity clusters were defined in proximity to the Cabaçal Mine environment, representing targets to test for mineralized stratigraphic extensions

MINE CORRIDOR: ANALYTICAL SIGNAL VTEM MAGNETICS WITH TARGETS

Note:

*Readers are cautioned that the historic resource is not considered to be current for purposes of NI 43-101. A 0.20% CuEquiv % cut off grade was applied (CuEquiv % = Cu % + (0.51 * Au ppm); Met. Recovery = 85% Cu, 65% Au; Au price US\$ 845 / oz; Cu price US\$ 4000 / ton).

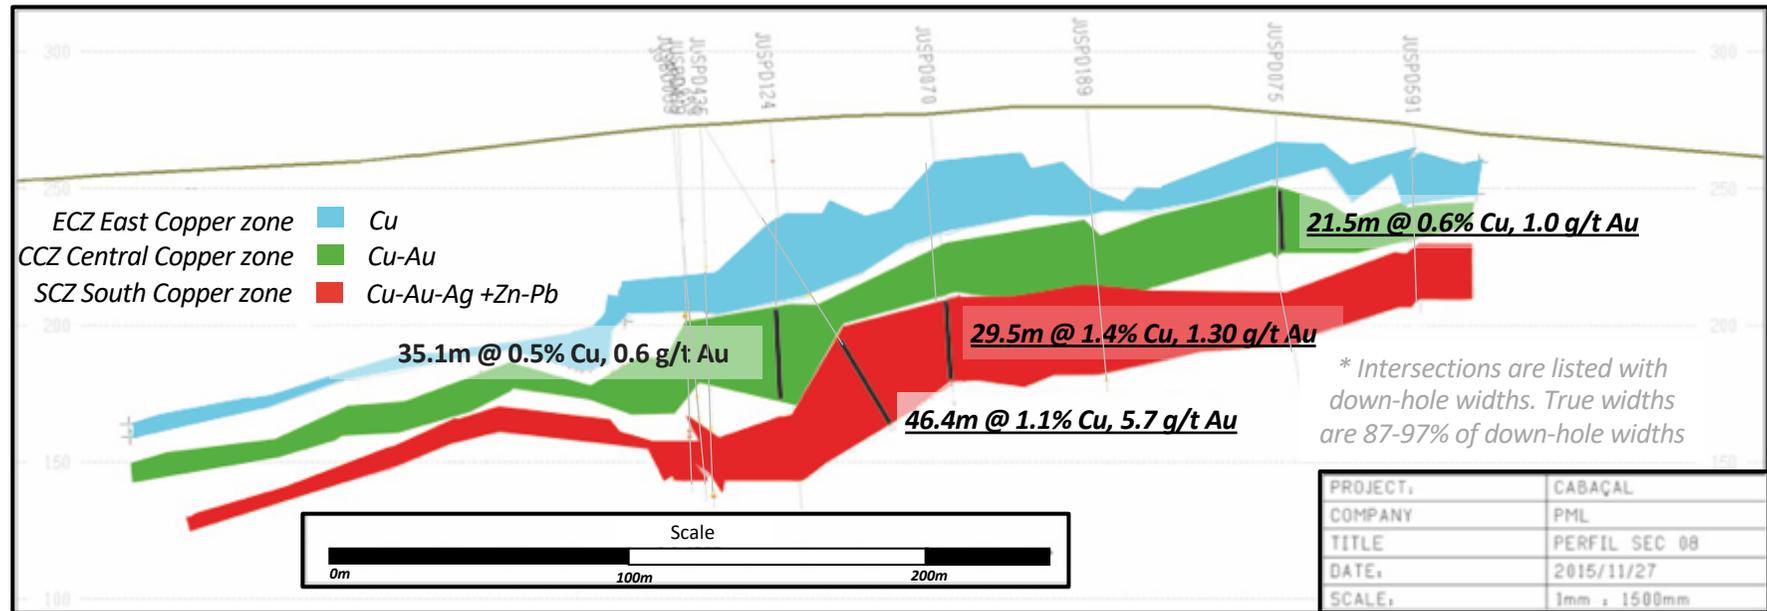

CABAÇAL: EXISTING MINERALIZATION

OPEN PIT AND UNDERGROUND DEVELOPMENT POTENTIAL:

- Cabaçal has multiple thick shallow dipping zones of copper, gold and silver mineralization
- Historic high grade development extended over 650m within the 1.8km Cabaçal mineral system
- Main stockwork stringer zone undeveloped historically with lenses are commonly 25m to 40m thick and shallow dipping; ideal geometry for open pit mining
- Historically Cabaçal mined high grade sub-vertical gold-copper “feeder” mineralization associated with flat lying sulphide lenses, analogous to Canadian VMS deposits
- Underground extensional potential - intersections close to the lower limit of historical development

CROSS-SECTION OF HISTORICAL DRILLING

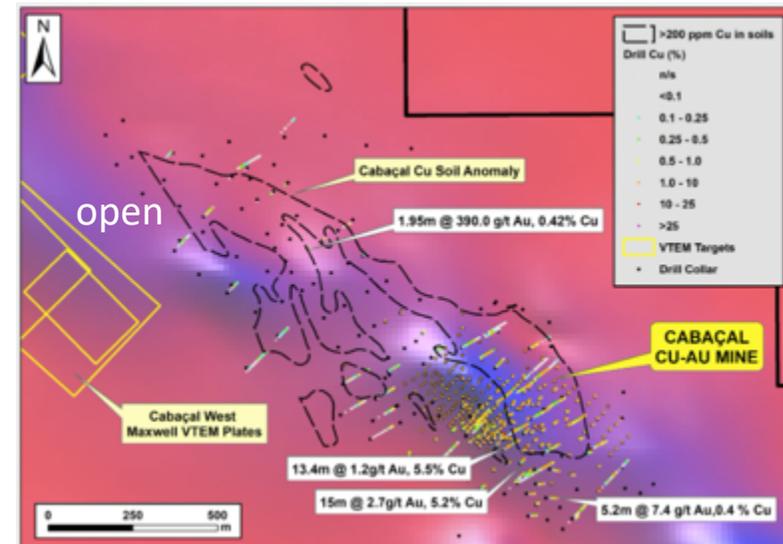

CABAÇAL: RESOURCE CONFIRMATION AND EXTENSIONAL PROGRAM

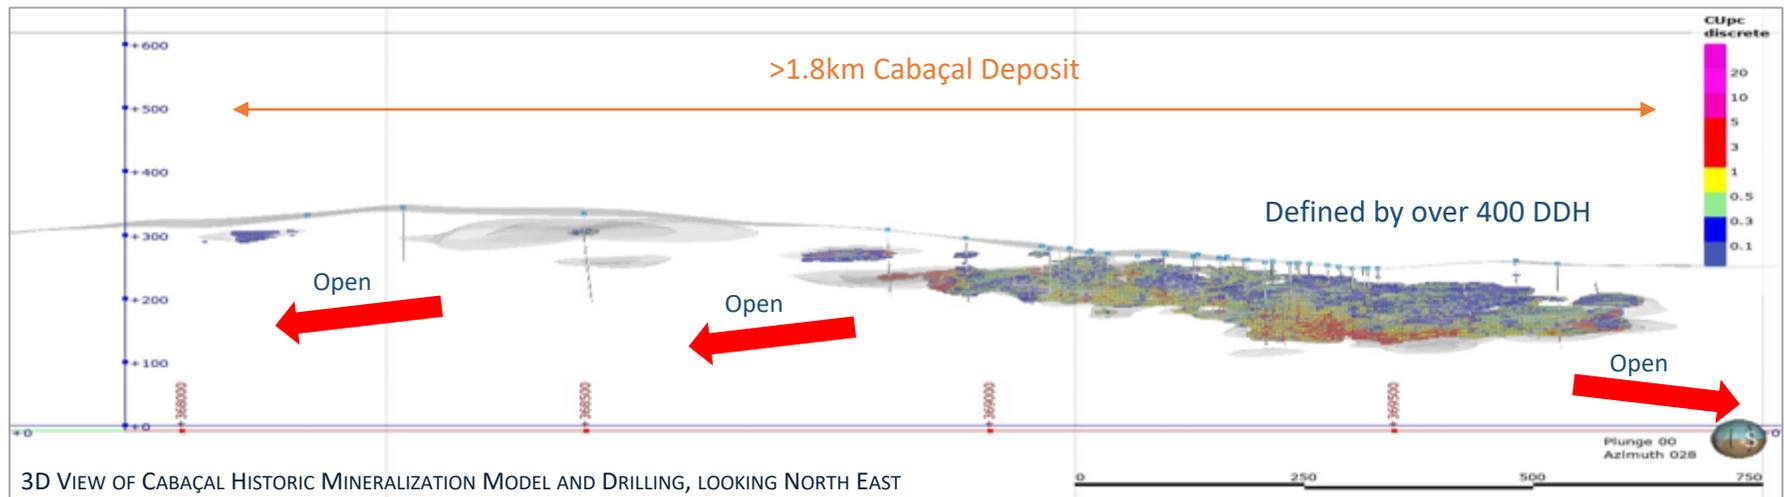

CABAÇAL RESOURCE DEVELOPMENT PROGRAM*

- Digital capture of additional historical data
- Landholder access agreements and environmental licencing
- Validation drilling program:
 - 60 – 70 drillholes (30 twin) ~ 7,000-8,000 m
 - Confirm repeatability of historical grades and widths
- Exploration program:
 - 2,000 - 3000 m of trenching and regional drilling
 - Extension of soil grids
- **Targeting initial NI 43-101 Resource by Q3, 2021**

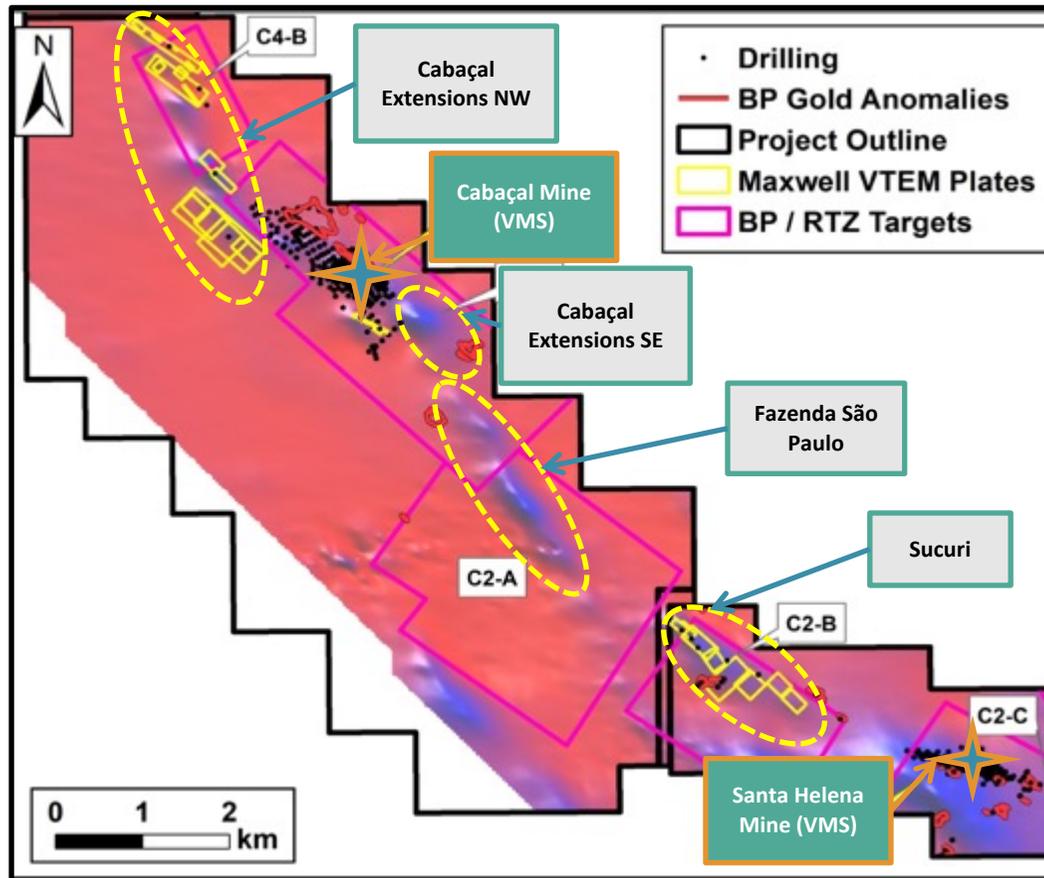

CABAÇAL MINE AREA CU SOIL ANOMALY

3D VIEW OF CABAÇAL HISTORIC MINERALIZATION MODEL AND DRILLING, LOOKING NORTH EAST

CABAÇAL: MINE CORRIDOR EXPLORATION PROGRAM

CABAÇAL MINE CORRIDOR EXPLORATION TARGETS

MINE CORRIDOR EXPLORATION TARGET

- Modern VTEM data and historical geochemistry outlines a series of targets for Cu-Au and Zn-Pb-Ag mineralization
- One granted mining lease; one mining lease application
- Highly prospective for repeat VMS mineralisation as deposits typically occur in clusters

MINE CORRIDOR EXPLORATION PROGRAM

Testing the hydrothermal copper-gold VMS Clusters:

- Follow up 2007 HELITEM® EM survey targets
- Extension of historical soil grids over satellite conductors
- Trenching and reconnaissance drilling over soil anomalies
- Select diamond drilling of deeper-seated EM anomalies

CABAÇAL: A STRUCTURED OPTION AGREEMENT

PROTECTS MERIDIAN SHAREHOLDERS EQUITY AND PROVIDES VENDORS AN INTEREST GOING FORWARD

The Cabaçal option agreement is to acquire a 100% beneficial interest for a total consideration of USD 8.75 million and 4.50 million Meridian shares

The payments in cash and shares are spread over approximately 39 months and are milestone based

As Meridian advances Cabaçal its value increases, the investment risk decreases, and milestone related payments are made

Payments	Payment Schedule (Months)	Requirements	Vendor Payment (USD)	Vendor Payment (Shares)
1	Complete	MNO will have exclusivity during the Due Diligence period	25,000	-
2	Complete	Positive Due Diligence; Filing of Title Transfer	275,000	-
3	16	1st phase drilling program, subject to statutory approvals & access agreements, with independent QP review	1,750,000	-
4	22	Completion of NI 43-101 resource estimation	-	1,000,000*
5	31	Positive Feasibility Study concluded	1,850,000	1,500,000*
6	est. 41	Installation Permits (LI) granted by Mato Grosso State	2,250,000	2,000,000*
7		Cabaçal mine construction finance has been secured	2,600,000	-
Total Financial Consideration			8,750,000	4,500,000

CABAÇAL OPTION PAYMENTS SCHEDULE

Note:

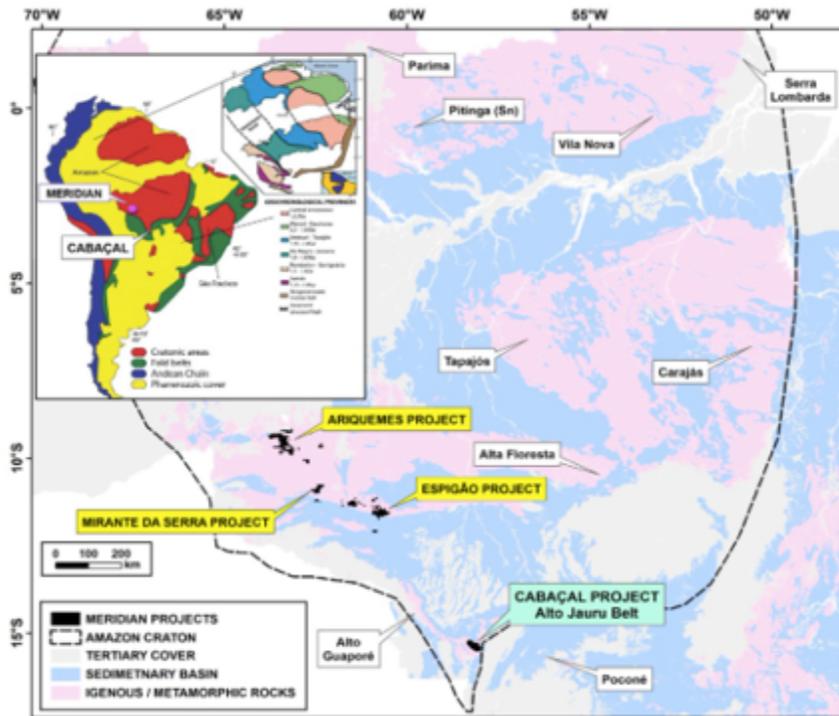

*Option for cash or shares at the Vendors discretion
See Meridian News release August 26, & September 3 2020

CABAÇAL: CONVENTIONAL COPPER-GOLD VMS SYSTEM

GEOLOGY

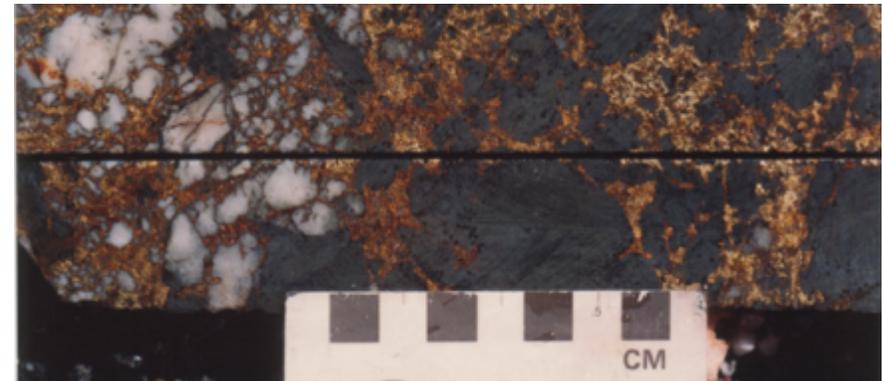

Location:	Southern Amazonian Craton
Local domain:	Alto Jauru Greenstone belt
Deposit type:	Volcanogenic Massive Sulphide (“VMS”)
Host units:	Metamorphic volcanic and volcanoclastic sedimentary rocks

TECTONIC CONTEXT OF THE CABAÇAL PROJECT

MINERALISATION

Type:	Massive to stockwork, stringer and disseminated sulphide mineralization Hosted in three well defined, gently dipping zones. Individual sheets may be 25 - 40m thick
Minerals:	Chalcopyrite (Cu), Sphalerite (Zn) and Galena (Pb) pyrite, pyrrhotite, free gold
Products:	Historic products include gold rich copper-silver concentrate through standard froth floatation, and Au-Ag doré

EXAMPLE OF HIGH-GRADE COPPER-GOLD MINERALIZATION

THE ESPIGÃO CU-AU POLYMETALLIC PROJECT

MERIDIAN OWNERSHIP:

- 100% of the Espigão exploration and mining licenses

LOCATED WITHIN THE AMAZON CRATON:

- Regional base metals mines and major exploration programs (Anglo American, NEXA and Codelco)

CU-AU TARGET WITH DISTRICT SCALE ZONATION:

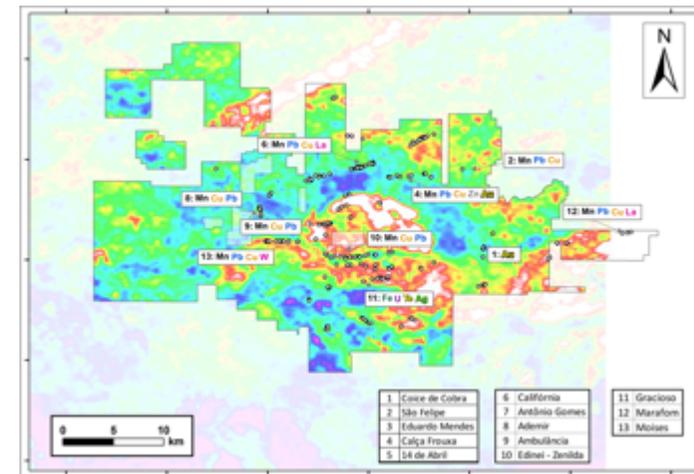

- IOCG / intrusive related Cu-Au exploration hypothesis supported by pathfinder elements, indicator minerals, brecciated Fe-Mn oxide rocks
- Gold and base metal anomalies in multiple structural corridors in an area >30 km by 15 km in extent
- Project extensively covered with HELITEM® geophysics, with new conductors being modelled at depth
- Spatial association between geophysical anomalies at depth and surficial structures hosting polymetallic vein systems

CURRENT EXPLORATION PROGRAMS

- Soil survey and reconnaissance exploration
- Further geophysical modelling in progress
- Rank anomalies and systematically testing with further exploration

ESPIGÃO PROJECT LOCATION

ESPIGÃO METAL CORRIDORS ON TOTAL COUNT RADIOMETRICS

ESPIGÃO POLYMETALLIC PROJECT- ADVANCED BUT UN-TESTED*

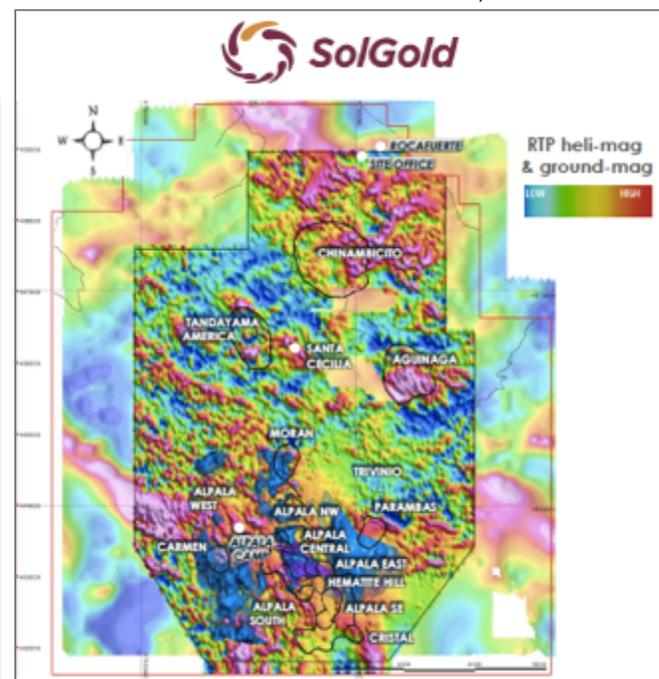

THE IMPORTANCE OF THE GEOPHYSICAL/GEOCHEMICAL- ANALOGUES

The Espigão polymetallic project contains multiple deep-seated magnetic anomalies and conductivity anomalies.

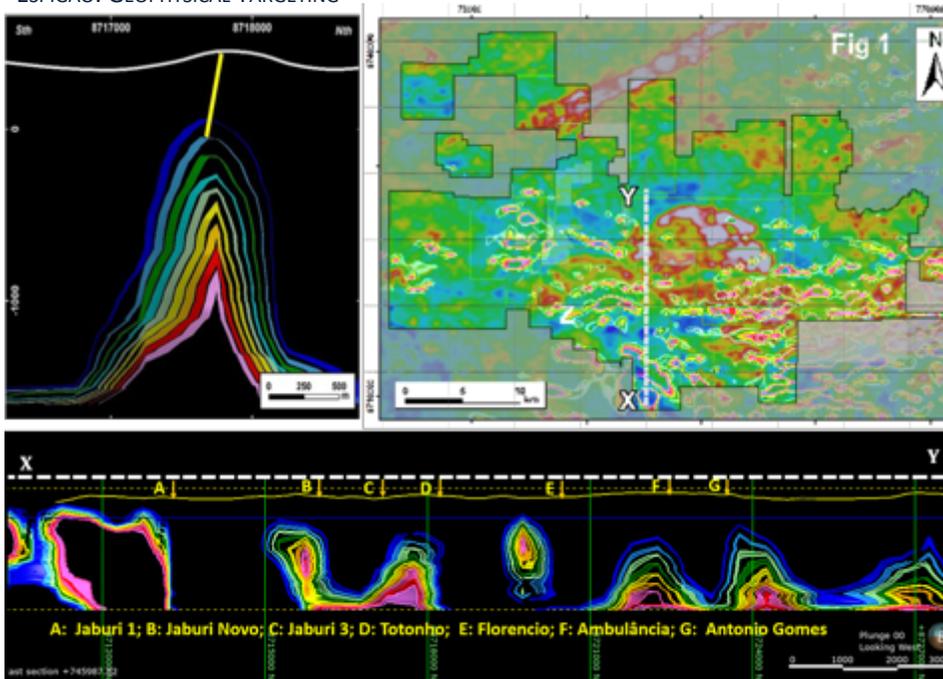

Geochemical and geophysical vectoring has driven exploration success in other camps:

- ✓ Cannington (South 32): Ag-Pb-Zn polymetallic - 60m below surface discovered via an aeromagnetic survey
- ✓ Oak Dam (BHP): Cu-Au IOCG - 800m below surface discovered via a surface gravity survey
- ✓ Cascabel (SolGold): Cu-Au porphyry - Soil geochemical vectoring then helimagnetic survey

SOLGOLD: MAGNETIC AND GEOCHEMICAL TARGETS, ALPALA**

ESPIGÃO: GEOPHYSICAL TARGETING

Note:

* Geophysical exploration targets are preliminary in nature and not conclusive evidence of the likelihood of a mineral deposit

** Source – SolGold Website (www.solgold.com.au)

LEADING COMMUNITY BASED ESG AND SDG PROGRAM

MERIDIAN THINKS GLOBALLY BUT ACTS LOCALLY

- CORPORATE SOCIAL RESPONSIBILITY (CSR):
 - CSR focuses on developing an open and transparent relationship with all stakeholders
 - Community engagement program managed by in-house Legal & Land management team, resident in Rondônia
 - Professional compensation program for landowners impacted by exploration and or mining activities
 - Health and Safety education program for employees and local communities
- ENVIRONMENTAL AND SUSTAINABLE DEVELOPMENT GOALS:
 - 2020 adoption of the Equator Principles
 - Environmental improvements are continuously monitored and upgraded to be environmentally friendly and low impact work programs
 - In-house Environmental Management System monitors water quality, rainfall, and vegetation regrowth
 - Baseline for future comparison and proven land rehabilitation program enhancing agricultural attributes

BOARD OF DIRECTORS

CHARLES RIOPELE

CHAIRMAN OF THE BOARD

- Accomplished senior level executive with 20 years investment and management experience in mining. Including serving as a director and/or officer of several Canadian and international companies
- Founder and managing partner at Latitude 450, a private equity fund specialized in mining. Previously with The Sentient Group and SGF
- Appointed to the Board of Directors of Women in mining Canada. Board member of Aligo Innovation

ADRIAN MCARTHUR

CEO & DIRECTOR

- PhD –qualified geologist with over 25 years of experience in exploration, resource delineation and project generation roles for gold, base metals, and industrial minerals.
- Acting as the Chief Geologist for Meridian since 2015, identifying polymetallic targets at Espigão
- Dr. McArthur is a "qualified person" within the meaning of National Instrument 43-101

GILBERT CLARK

DIRECTOR

- 20 years of geological and investment experience within the natural resources industry; and a including as Director of various TSX companies
- Formerly a Partner with Sentient Equity Partners, and a Senior Investment Advisor for The Sentient Group. Responsible for portfolio investments covering base and precious metals in Europe, Greenland and South America
- Resource development and production experience from the Eastern Gold Fields of W.A.

EXPERIENCED EXECUTIVE MANAGEMENT

SORAIA MORAIS

CHIEF FINANCIAL OFFICER

- Chartered Professional Accountant with over 15 years of experience in accounting and financial management in the resource sector in 2009
- Extensive business background including managing her own business and spending 5 years at PWC Brazil
- Dual citizen of Canada and Brazil and fluent in English and Portuguese

VITOR BELO

PRINCIPLE BRAZILIAN MINING CONSULTANT

- Mining consultant with over 30 years experience in gold & base metal operations and project commissioning.
- Previous experience for companies such as Rio Tinto, Kinross and Yamana and also for small-cap companies as Rio Novo, Carpathian Gold and Brio Gold.

JOEL JULIO BRANDÃO

RESIDENT MANAGER ESPIGÃO
DIRECTOR OF BRAZIL SUBSIDIARY

- Over 37 years of experience in the Brazilian mining industry covering project administrator, exploration, infrastructure and the operation of mines
- Previous experience for multinational companies in gold and manganese in the Amazon. TSX companies include: Serabi gold, Electrum Capital and Alta Floresta Gold

KATHERINE MACLEAN

COMPANY SECRETARY

- Qualified lawyer with 10 years experience in Company Secretary and corporate development in the resources sector
- Experienced in due diligence, corporate governance, project management and risk assessment
- Prior mining fund Corporate Secretary, working with public & private companies
